NAV Mobile App

captivix

Mobile devices have truly transformed the way we communicate. According to recent surveys, half of all U.S. adults own a smartphone or tablet. Sadly, however, most companies still rely on manual processes, clipboards and multiple duplicate forms to conduct business today.

Captivix is working to change that. We're helping companies take the opportunity to create business programs that make better use of mobility. It provides the opportunity to reshape the business and introduce new strategies that can help shape new practices to gain a competitive edge and strengthen customer offerings.

Let's take the opportunity together to combine the power of ERP solutions with mobile apps. We offer out of box mobile apps as well as customized solutions that can be easily integrated with Microsoft Dynamics NAV, Microsoft Dynamics AX, and Microsoft Dynamics 365 for Operations.

Our out-of-the-box mobile ERP apps focus on optimizing your teams and streamlining business. It significantly cuts down training and operational efforts and is always available - even in offline mode.

Mobile ERP Application Solutions

- *User friendly UI-UX with no training required*
- *Seamless creation and processing of sales quotations and sales orders*
- *Digital signatures*
- *Offline mode operations*
- *Print directly from mobile*
- *Barcode scanner*
- *Cost savings on mobile ERP licenses*
- *Creation of credit memos and return orders*

Now, your team can focus on what they do best and quickly create quotes, orders, review customer balances and open invoices, create credit memos, return orders, check inventory, know when a delivery has been made, and more.

Highlighted features

User Friendly Design
Build around a great user experience, our app minimizes the time needed for a user to get familiar with the working of the app which reduces training time and increases productivity right away.
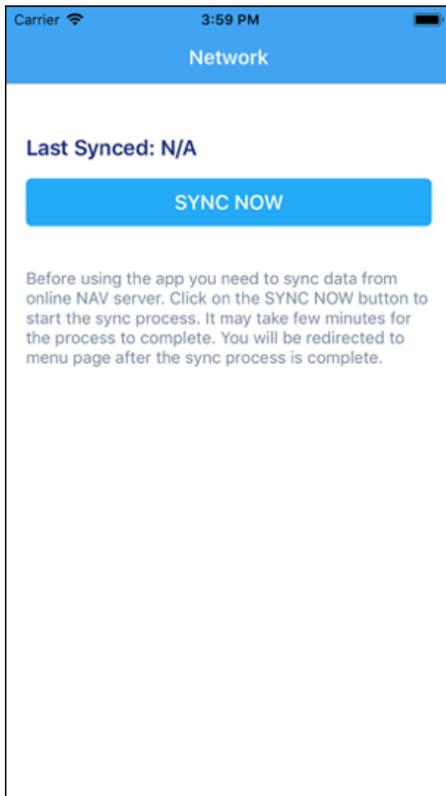

Offline Mode
With built-in capability to work in offline mode, sales reps don't have to worry about connectivity or waiting for slow connections while working on the go. This option gives users the ability to work even from remote locations. The app syncs back when field staff are back in the office.

Customization
Every business is unique and you are no exception. That's why you need a mobile ERP app that can be tailored to the way you do business. The Captivix mobile ERP app does just that and meets any custom requirements needed by your business.

Reduced Licensing Cost
Instead of purchasing a full ERP license for each rep, you can reduce licensing cost by using the mobile app for your sales team.

Installation and Setup

Whatever your mobile device, you can install and set up Captivix Mobile NAV Module.

Android - https://play.google.com/store/apps/details?id=com.captivix.navapp

App Store: https://itunes.apple.com/us/app/dynamics-nav-mobile-captivix/id1397846574?ls=1&mt=8

Open the app, enter your NAV login credentials and tap "Let's Explore". Complete the simple form, provide your NAV Server URL, and you are ready to sync between the mobile app and your NAV server.

We have step-by-step instructions on the Captivix website that will guide you through this part of the process. And, if you run into any issues, contact us directly at support@captivix.com.

For too long, you've been told what type of software you need for your business. Isn't it about time someone listened to what you actually want? Let's talk today; we're expecting you.
