

UNO Mobile ERP

Mobile ERP - Anytime. Anywhere.

Mobile ERP is critical to business success

Desktop applications are no longer enough to support your customers and staff. Sales reps are in the field, employees work remotely, business partners need instant access to your data, and your competitors are looking for the latest edge.

What's the answer?

Mobile ERP from UNO

The Uno Mobile App for Microsoft Dynamics allows you to simply hook your existing Dynamics NAV, Dynamics 365 Business Central.

Mobile ERP from UNO is a flexible and scalable application that offers:

- **Secure, remote access from phones and tablets**
- **Synchronized ERP data, including customers, inventory, products, sales, warehouse, and transportation**
- **Real time updates for improved insights and reporting**
- **Digital signatures, print from mobile, and other convenient features**
- **Work offline (no network required), sync when online**
- **Barcode scanning and geographic locations**
- **Available for iOS and Android devices**

iOS

ANDROID

Power and convenience for your mobile devices.

The UNO Mobile ERP App

Enjoy easy access to Dynamics NAV Business Central on the go, from your smartphone or tablet. Work where work happens - at the client, in the office, or on the go.

UNO is a native mobile app that is fully integrated with Dynamics NAV, supporting real-time access or offline mode for those times when you don't have connectivity.

This powerful app will help you manage Sales, Products and Inventory, Warehouse, and Transportation functions from iOS or Android devices.

SALES

Monitor real-time sales data to keep your team making data-driven decisions. New customer registration, existing customer management, sales order management, package tracking, invoicing and payment are just part of the robust features.

→ **New Customer Registration**

Securely register new customers and manage shipping addresses.

→ **Existing Customer Management**

Login management for existing customers, including the ability to edit customer details and shipping addresses, review orders and payments, track packages and shipments, and manage returns.

→ **Sales Order Management**

Create sales orders, including customer, order date, and sales person. Include ordered products, pricing, tax, discounts, and line amounts.

→ **Shipment and Package Tracking**

View posted shipments, including items and quantities shipped. Track packages by shipment method, carrier, shipping agents, and estimated delivery date.

→ **Invoicing and payments**

Easily view posted sales invoices and track payments by payment method and terms.

WAREHOUSE MANAGEMENT SYSTEMS

The UNO mobile app provides a robust platform for WMS, securely providing flexibility and visibility into warehouse operations.

- **New Customer Registration**
Securely register new customers and manage shipping addresses.
- **Warehouse locations**
Manage detailed location information that includes address information and requirements for receiving, shipping, picking, or putaway.
- **Warehouse shipments**
Create shipments including detailed information, including warehouse location, bin, and zone; post and view shipments.
- **Warehouse Receipts**
Create receipts including detailed information like product, location, bin, zone; post and view receipts.
- **Put Aways**
Organize, view, and control putaway processes to manage the flow of items through your warehouse.
- **Picks**
Create, register, manage and view picks as part of your warehouse process for both external customers or internal production processes.
- **Bins**
View list of bins by type, location, content, and quantity.

Transfer Orders

Transfer inventory between locations, including inbound, outbound, and in-transit locations. Create and view orders including item, quantities, and status.

Physical Inventory

View inventory from the UNO app, including product descriptions and quantities available, on order, or backordered.

Inventory Adjustments

Count, adjust, or reclassify inventory directly to the general ledger. Change dimensions and update expiration dates where applicable.

Item Cross-Reference

Cross reference items by vendor or customer.

Barcode Scanning

Scan and read barcodes.

Item Substitution

Recommend substitute items when ordered items are not in stock.

Cycle Counts

View all items assigned to a cycle count, log quantities, and view scheduled cycle count dates.

TRANSPORTATION MANAGEMENT SERVICES

The UNO app helps you manage critical transportation services, giving you visibility to shipments and deliveries. Save money through route optimization and fleet management while ensuring you deliver on your promise to your customers.

→ **Real-time Tracking**

Track shipments in real time by order number, vehicle, and estimated arrival time.

→ **Route Optimization**

Significantly reduce transportation expenses by optimizing deliveries by vehicle, delivery location, and orders.

→ **Fleet Management**

Monitor real-time vehicle status by location, status, licensing, vehicle speed and drivers to keep your vehicles on the road.

Driver Operations

Monitor the efficiency of your drivers, with visibility of location, deliveries scheduled and made, and route times using Google Maps.

Transparent Pricing from Captivix

We believe in transparent pricing and offer a flat fee for initial implementation and ongoing maintenance. Just see our website, Captivix.com, for current pricing.

ADDITIONAL FEATURES

- **Service Orders**
Create service orders including customer, contact details for the customer, service item, item, service order type, response date and time, priority, repair status, symptom, fault, and resolution.
- **Print Reports**
Print NAV reports directly from the UNO app for convenience on the go.

UNO and Dynamics 365: A Winning Combination

UNO is designed to support Dynamics 365, the most popular ERP systems now available for their robust capabilities. Adding mobile capabilities to your ERP system will:

- **Improve productivity**
through 24/7 remote access to data for your employees and business partners.
- **Provide real time data**
for improved reporting and decision making
- **Offer convenience**
and security anytime, anywhere

About Us
